- Unlimited remote users—equip all your reporters
- Conference hosts, guests and reporters together, at will
- Unlimited usage—24/7—One flat rate

Full Control—For Both Screener and Host

The Future of Sports/News/Talk Radio, Today

Distributed Broadcasting—In the Cloud

Your Station **Anywhere**. This means you can produce your radio shows from **everywhere**, simultaneously. Conference studio quality live feeds from your co-hosts around the world, guests and field reporters, who require nothing more than

an iOS or Android smartphone or tablet, using the included **Luci® Global** app. Backbone Co-Host, is the cloud-based radio backhaul service developed specifically for professional Sports/News/Talk stations, by the makers of **Backbone Radio™** and **Backbone Talk™**.

Features

- Requires no special transceivers or encoding equipment
All your studio needs is a Mac/mixer/headset combo
Also compatible with your existing **Comrex Access™**
Remotely, all they need is a laptop and headset
Or, a smartphone or tablet with the Luci mobile app
- All feeds route via the **Backbone Broadcast Bridge (B³)**
Unique, multipurpose, studio quality PBX in the cloud
Uses same interface as **Backbone Talk** phone system
Controlled on a Mac by Producer/Screener or Host
Screener can be local, near talent/host, or in any city
Interface switches feeds and controls individual levels
Push-To-Talk Return Party Line IFB/PL from producer
Simple, intuitive, color-coded interface
- Integrates with **Backbone Radio** broadcast automation and Backbone Talk multi-line call-in phone system
- Conference up to ten (10) feeds (and, with Talk, calls)
- Private text/chat line between screener & studio host
